

The LogDepot family consists of 3 product lines:

LogDepot Appliances

Easy, Plug & Play and very attractively priced!

The LogDepot Appliances are simple off-the-shelf LogDepot boxes at a very competitive price level. Standard configuration profiles eliminate complex setup procedures.

LogDepot Appliances require no onsite installation of customized configuration. Connect & Record or Plug & Play!

LogDepot Solo

Running on a single PC or server

Audio/Video recording and streaming system, running on a single PC or server.

The SOLO is a full LogDepot system, customizable and flexible and includes possibilities to integrate into a customer's environment.

LogDepot Enterprise

Turn-Key, Extremely Scalable, various Redundancy Levels

The most comprehensive LogDepot solution, including full redundancy options, professional SNMP support, seamlessly integrated in the customer's infrastructure.

LogDepot Enterprise is always installed onsite by an Arbor specialist, or an Arbor Certified engineer.

► CONFERENCE

The all-in-one recording & live streaming solution

Do you recognise the ease of use of LogDepot ?? Then please contact us: info@arbormedia.nl or +31 (0)314 399 055. We gladly show you how LogDepot 7 can support you in your daily work.

LogDepot is Arbor Media's automatic recording and live streaming solution

It is on the market since 1998 and - thanks to never ending improvement and innovation - modern as ever before. LogDepot is used by Parliaments, Court Rooms and City Councils. It is the market leading solution within Europe, known for its robustness, reliability and user friendly operation, practically eliminating the risk of lost recordings.

In today's conference recording business, there is - more than ever before - a need for efficient and reliable recording and streaming. Gone are the days where you would have a bunch of systems doing various recording & encoding tasks. It is not affordable anymore. And it is not necessary anymore.

Now there is LD7, the latest LogDepot version!

Unique features

- ▶▶ Integrates with all major microphone systems
- ▶▶ Multi Language tracks (unlimited!)
- ▶▶ Web-based navigation and browsing
- ▶▶ Multi browser and tablet support
- ▶▶ Clip based search & navigation
- ▶▶ Full search interface (showing most relevant results on top)
- ▶▶ Full support for international character sets
- ▶▶ Support multiple timelines
- ▶▶ Frame accuracy
- ▶▶ Full SNMP support
- ▶▶ Browsing using High Quality format or Proxy format
- ▶▶ Runs with native H.264/AAC recording

Applications

- Compliance Recording
- Competition Recording
- Live streaming
- Live recording
- Broadcast Monitoring
- Ad tagging

Transcription Player

The ideal VCR

LD7 is the final, ideal VCR. Recording from any interface, encoding to any common format & bitrate, sending out live streams simultaneously and with virtually unlimited storage capacity. Equipped with an extreme practical user interface to quickly retrieve any part of the recording.

It is no rocket science!

It is just a robust implementation of today's technology!

LD7 captures audio and video feeds from your meeting rooms. It creates the live streams you need for webcasting, records all the formats you desire, for transcription, web publication, archiving and broadcast services. At the same time it will automatically capture all relevant metadata, such as speaker names and agenda items. LD7 provides a fast and user friendly web-based interface for frame-accurate editing and cutting.

The integrated playlist function lets you collect various clips (such as all clips from the same speaker), order them as you like and export it as one file.

LogDepot 7 integrates seamlessly with Connected Views
